

5-EXT EXTENSION

The 5' extension is designed for second story deployment of NFDD's. This extension is mated with the BP series NFDD delivery poles which allow your port team operator the ability to place a NFDD near an opening at a height of 15' to 17'. The 5EXT-SE is equipped with a 12" stand off leg which allows the operator the ability to rest top clamp head portion containing the NFDD near an opening until deployment is needed. The 5EXT-SE has a total length of 60" and weighs 7 lbs.
