

BANGSTICK

NFDD DELIVERY POLE

FEATURES/SPECIFICATIONS

- Safe and controlled delivery of noise flash diversion devices.
- Direct control of the device placement at moment of deflagration.
- Precludes the possibility of injuries by tossing/contact errors, no “ignition in the hand” and no flying body impacts.
- The Bangstick reduces the probability of the most common NFDD injuries to zero.
- Removable clamp head assemblies for all makes and models of NFDD’s.
- Easy to use manual trigger system – integrated in rear handle.
- Break head with replaceable break tips.
- Angled design provides for additional standoff while breaking/raking and deploying NFDD.
- Easy to remove and replace NFDD’s in secure clamp head assembly by only loosening two bolts.
- D-ring on end of standoff to secure pole while porting from a vertical position.
- Protective hood cover included to protect break tips
- Overall length – 84”
- Weight – 13.8 lbs
- No extensions available for this pole
